BY

FRANCIS MEREDYTH, M.A.

CANON OF LIMERICK CATHEDRAL.

"Nummos contemplet in Arca."—HORATIUS.

LONDON:
TRÜBNER & CO., LUDGATE HILL.

1875.

[*All rights reserved.*]

280 . n . 783 .

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for ensuring transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It highlights the need for consistent and reliable data collection processes to ensure the validity of the results.

3. The third part of the document describes the different types of data that are collected and analyzed. It includes information on both quantitative and qualitative data, as well as the various sources from which the data is obtained.

4. The fourth part of the document discusses the various statistical methods and techniques used to analyze the data. It covers topics such as descriptive statistics, inferential statistics, and regression analysis.

5. The fifth part of the document discusses the various ways in which the results of the analysis can be presented and communicated. It includes information on the use of tables, graphs, and charts to effectively convey the findings.

6. The sixth part of the document discusses the various ways in which the results of the analysis can be used to inform decision-making. It highlights the importance of using the results to identify trends, patterns, and areas for improvement.

7. The seventh part of the document discusses the various ways in which the results of the analysis can be used to inform policy-making. It highlights the importance of using the results to inform the development of policies and programs that are based on evidence and data.

8. The eighth part of the document discusses the various ways in which the results of the analysis can be used to inform research. It highlights the importance of using the results to inform the design and implementation of future research studies.

9. The ninth part of the document discusses the various ways in which the results of the analysis can be used to inform practice. It highlights the importance of using the results to inform the development of best practices and standards for the industry.

10. The tenth part of the document discusses the various ways in which the results of the analysis can be used to inform education. It highlights the importance of using the results to inform the development of educational programs and materials that are based on evidence and data.

NOTE ON TITLE.

“Χαρταφιδάκιον” should have been a more critically and classically correct, but “Arca” is a less pedantic and pretentious title. In Numismatology, the term “nummos,” which occurs in the motto, comprises currency from minimum to maximum value. The present collection may be classed in the category of the former, taken as *paper* money. How far it shall be permitted to circulate remains to be proved. “The trial of the Pyx,—a chest or coffer (“Arca”) in which are deposited pieces of different gold and silver coins,—is,” says the lexicographer, “the trial of these coins previous to their being issued from the Mint, and takes place by jury in the Court of Exchequer.” To such *assay*-process the

contents of this "Arcula" are now submitted. Peradventure they might be challenged in the words of Iago—

"What may you be? Are you of good or evil?"

To which response is hereby made in the rejoinder of Lodovico—

"As you shall *prove* us, praise us."

CONTENTS.
