NO.8, PP. 317-360**

SYR. HYPOPHOS. CO., FELLOWS,

Contains the Essential Elements of the Animal Organization—Potash and Lime;

The Oxidizing Agents—Iron and Manganese;

The Tonics—Quinine and Strychnine;

And the Vitalizing Constituents—Phosphorus; the whole combined in the form of Syrup with a Slightly Alkaline Reaction.

It differs in its Effects from all Analogous Preparations; and it possesses the important properties of being pleasant to the taste, easily borne on the stomach, and harmless under prolonged use.

It has Gained a wide Reputation, particularly in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.

Its Curative Power is largely attributable to its stimulant, tonic and nutritive properties, by means of which the energy of the system is recruited.

Its Action is Prompt: it stimulates the appetite and the digestion, it promotes assimilation, and it enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; hence the preparation is of great value in the treatment of mental and nervous affections. From the fact, also, that it exerts a double tonic influence, and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

NOTICE—CAUTION.

The success of Fellows' Syrup of Hypophosphites has tempted certain persons to offer imitations of it for sale. Mr. Fellows, who has examined samples of several of these, finds that no two of them are identical, and that all of them differ from the original in composition, in freedom from acid reaction, in susceptibility to the effects of oxygen when exposed to light or heat, in the property of retaining the strychnine in solution, and in the medicinal effects.

As these cheap and inefficient substitutes are frequently dispensed instead of the genuine preparation, physicians are earnestly requested, when prescribing the Syrup, to write "Syr. Hypophos. Fellows."

As a further precaution, it is advisable that the Syrup should be ordered in the original bottles; the distinguishing marks which the bottles (and the wrappers surrounding them) bear, can then be examined, and the genuineness—or otherwise—of the contents thereby proved.

Medical Letters may be addressed to:

Mr. FELLOWS, 48 Vesey St., New York.

CLEMIANA

VIN MARIANI

"THE STANDARD PREPARATION OF ERYTHROXYLON COCA."

Careful, continued testing by upwards of seven thousand practitioners in America, whose written opinions over their signatures (in our possession) are fully in accord, and clearly prove the efficacy and merits of "VIN MARIANI," may be thus summarized:

"Diffusible stimulant and tonic in anemia, nervous depression, sequelae of child-birth, lymphatism, tardy convalescence, general 'malaise,' and after wasting fevers.

"Special reference to the nervous system, in all morbid states, melancholia, etc.

"Tonic in laryngeal and gastric complications, stomach troubles.

"All cases where a general toning or strengthening of the system is required.

"The only tonic stimulant without any unpleasant reaction, and may be given indefinitely, never causing constipation."

N. B.—This Wine has been found always uniform and reliable, owing to the selection of the finest ingredients and the greatest accuracy in its manipulation. When prescribing, therefore, the medical profession are strongly advised to specify "VIN MARIANI," in order to avoid the substitution of imitations, often worthless, and consequently disappointing in effect.

Please Specify "VIN MARIANI."

Camm's Emulsion of Pure Norwegian Cod Liver Oil

AN HYPOPHOSPHITES OF LIE AND SODA,

As the name indicates, is composed of all the above-enumerated ingredients, happily combined into a remedy, not unpalatable, and easily retained by the stomach. Possessing so many properties for good, it is confidently recommended to the medical faculty as a most valuable curative agent.

We claim superiority for CAMM'S EMULSION in the fact that the ingredients of its manufacture are purer than those generally used, and particularly that we avoid the use of all alkalies, the hypophosphites being the only alkaline substance that it contains. The so-called emulsions which are so much in use are only LIQUID SOAP, made by the addition of a strong alkali (generally sal-soda) to the oil, by which a smooth, handsome mixture is produced, but which has no therapeutic property whatever, further than the soft soap made in the ordinary way. In Camm's Emulsion the oil globule is left intact, but all the ingredients are thoroughly incorporated into a homogeneous mixture, and the therapeutic properties are not sacrificed to pharmacy. The salts are *thoroughly dissolved*, and there is no deposit or inert sediment of any kind in the bottom of the bottle.

MANUFACTURED ONLY BY

E. A. CRAIGHILL & CO.,

Wholesale Druggists, Lynchburg, Va.

Please note particularly that there is no secret about the mode of manufacture of the ingredients of CAMM'S EMULSION. Any one, no matter who, that is interested or who has any curiosity, is cordially invited to call and examine all the details of its manufacture, its ingredients, and, in fact, all about it. We claim, and believe, that it is the best preparation of its kind in the world, and we would be glad to have our opinion confirmed by outside disinterested persons proving what we believe.

The Physician of To-day

has escaped a great many popular prejudices—his preceptors had to fight them.

Cod Liver Oil was one of them—but there was some reason back of that prejudice. Plain cod-liver oil could never have become popular—patients requiring it could not, on account of its taste and indigestibility, take it in this plain form.

The modern idea of it—SCOTT'S EMULSION—together with the intelligent, experimental tests of progressive physicians have resulted in vastly multiplying the uses of cod liver oil.

SCOTT'S EMULSION of Cod Liver Oil with Hypophosphites is employed with success where plain oil is out of the question.

SAMPLE of Scott's Emulsion delivered free to the address of any physician in regular practice.

FORMULA: 50% of finest Norwegian Cod Liver Oil; 6 grs. Hypophosphite of Lime; 3 grs. Hypophosphite of Soda to the fluid ounce.
