SEXUAL DISABILITIES OF MAN**

“Qu'a fait l'action genitale aux hommes, si naturelle, si necessaire et si iuste, pour n'en oser parler sans vergogne, et pour l'exclure des propos serieux et reglez? Nous prononcions hardiement, tuer, desrober, trahir; et cela, nous n'osions qu'entre les dents.”

## PREFACE TO THE FIRST EDITION.

MANY years ago the writer published, with notes and additions, a translation of a short monograph on Sterility and Impotence by the late Professor Uitzmann, of Vienna, which has long been out of print.

The present little book is based mainly on what has been observed in practice during the last thirty years, and it is hardly necessary to say that it does not pretend to be exhaustive. But perhaps it may be of some use to the student who becomes a practitioner with little knowledge of matters which receive but scanty recognition in the medical schools of this country.

## PREFACE TO THE SECOND EDITION.

WITH the object of making this new edition less imperfect than the first, and in the hope also of making it more serviceable to the reader, the text has been revised and new matter, less or more, has been added to most of the chapters.
