SIDNEY P. JOHNSTON

**THE MANUAL
OF RECEIPTS**

IMPORTANT.

We would have you notice that the world is moving—moving rapidly, too. Rapid advances have been made in all kinds of business operations during the last decade, and in none more than in the Stove and Furnace business. Just here we would whisper in confidence to you, that this rapid advance, so far as the stove business is concerned, has not been an universal one. There are still some back numbers in the business—men who think “a stove good enough for **GRANDFATHER** is good enough for me.” Now, we feel sure you are not to be classed among that number; in fact, we **KNOW** you are not one of that class, otherwise you would not be reading this book. Now, then, knowing you to be a live, progressive, wide-awake dealer, we feel no hesitancy whatever in stating clearly and plainly, so as not to be misunderstood, that if you desire to keep your reputation of progressiveness, as well as your growing trade, you cannot afford to overlook our line of strictly up-to-date stoves and furnaces. Of course, we cannot enumerate them all here, but can only call your attention to our line of Penn Rether Ranges. They are the leading ranges on the market to-day. We make that assertion without fear of contradiction—it is an acknowledged fact. They are selling as fast as we can make them, and if you want to be in it, you cannot afford to do business without having them represented on your floor.

The same can be said of our Penn Perfect Furnaces—but in order to appreciate our line you should be in possession of our latest catalogue, circulars, etc., and a postal card will procure them. Remember that the Mt. Penn Stove Works, located at Reading, Pennsylvania, is moving—moving rapidly, as we stated the world was, at the beginning of this century—and in order to keep posted in the latest and best things in stove manufacture, you must keep in constant touch with Mt. Penn. Wherever you see the word “Penn” in connection with another word making up the name of a stove, “that’s us.”

The only Gasolene Stove
ever made that is **ABSOLUTELY SAFE**

We also make a full line of Juniors, New Process
and Cabinet Gasolene Stoves, Ovens, Cookers, Iron
Heaters and Broilers.

We solicit inquiries from all established Hardware
and Stove dealers or from those just starting.

Torrid Sunshine Furnaces

Keep Warm

As long as you
can.

As easy as you
can.

As cheap as you
can.

You want a furnace for the church or home. You should have the best. There is a difference in furnaces. You cannot judge by size, but dare you depend upon all that makers tell you, but you may safely believe what users say. So please send for our furnace book, and notice the ringing testimonials from people all over the land. Some of them you will surely know.

Thousands of Torrid Sunshine Furnaces are in use, making people comfortable and happy everywhere.

We make all desirable sizes and styles, either with a steel plate radiator, all cast radiator, and for hot air and hot water combined.

Remember, every furnace is fully warranted.

We are specialists in heating and ventilation, and will take pleasure in promptly furnishing any desired information.

Learn all about the Torrid Sunshine Furnace and you will buy no other.

Sold by the best dealers everywhere. Correspondence solicited.

The American Artisan Manuals

Each the highest authority in its particular field.
Each handsomely and substantially bound in red
cloth with cover embossed in gold.

The Tinsmiths' Pattern Manual

A practical book for sheet metal workers, by J. E. Little, C. E. It leads the learner by simple steps from simple geometric figures to the most complex practical problems. Declared by leading sheet metal workers to be the best sheet metal book published. Price.....\$3.50

The Furnace Work Manual

A practical handbook for furnace workers by Sidney P. Johnston. This thoroughly practical treatise is illustrated by over 200 cuts. It treats of furnace work proper, tells how the pipes should be cut, how they should be laid and connected, and describes the construction of furnaces, all the details of pipes, dampers, cold air supply chimneys, home made tools, &c. This book contains 288 pages and has been warmly commended by the trade and trade press. The price is.....\$3.50

The Workshop Manual

A workshop companion containing over 200 pages, compiled by J. J. Davies. It contains chapters on patterns, cutting, workshop receipts, plate roofing, moldings, the properties of metals and a number of useful trade tables. The price is.....\$3.50

The House Warming Manual

Contains the *prize* essays in THE AMERICAN ARTISAN House Warming Competition for cash prizes. Arranged for publication by Sidney P. Johnston. The latest and most up-to-date practical articles on steam heating, hot water heating and warm air heating, by the brightest minds in the trade. Price is.....\$3.50

Hot Water Manual

The revised American edition for 1897 of Walter Jones' Heating by Hot Water, the standard English authority on this subject. This book has been amended by the author with the needs of American heating practice constantly in view. It treats of high and low pressure systems, bath apparatus, hot water supply for public institutions, duplicate boilers, radiators, &c. It contains 245 pages and is sold for.....\$3.50
