TO
MY REVERED TEACHER IN PHILOSOPHY

James McCosh

EX-PRESIDENT OF PRINCETON COLLEGE

PREFACE.

THIS volume has grown out of lectures first delivered in Princeton in 1890, upon the period between Buffon and Darwin, and completed in a fuller course delivered in Columbia in 1893, which covered also the period before Buffon. When I began the study, my object was to bring forward the many strong and true features of pre-Darwinian Evolution, which are so generally passed over or misunderstood. When all the materials were brought together from the earliest times, the evidence of continuity in the development of the idea became more clear, and to trace these lines of development has gradually become the central motive of these lectures. More thorough research, which may, perhaps, be stimulated by these outlines will, I believe, strengthen this evidence.

I am greatly indebted to my friends Professor George Macloskie and Professor Alexander T. Ormond for assistance and critical advice in connection with the revision of the proofs.

H. F. O.

COLUMBIA COLLEGE, July 11th, 1894.
