To the Memory

OF

MY LATE FATHER,

WHOSE TEACHING IS FELT TO BE MORE VALUABLE AS
YEAR BY YEAR ROLLS ON,

This Book

IS

AFFECTIONATELY DEDICATED.

P R E F A C E.

THIS little work is intended for practitioners, and especially those who are commencing practice. It deals with a class of maladies which in our humid, changeable climate are very common; and which require considerable management, medicinal and dietetic—a matter scarcely dealt with sufficiently in the ordinary educational course.

The addition of numerous illustrations of diagrammatic character to illumine the text is felt desirable, as the lessons of pathology throw much light, of a practical character, upon the diseases of the air-passages. My thanks are due to the artist, Mr. Hanlon, for his execution of this part of the work. Also to Dr. H. G. Orlebar for his aid in the revision of the proof-sheets, as well as other favours.

110, PARK STREET,
GROSVENOR SQUARE, W.
February, 1882.
