PREFACE.

This book is written especially for the teachers of the Alaska school service, and pains have been taken to describe the symptom and outline the treatment of the common diseases of the natives in simple, plain language.

In Alaska there are large areas in which the services of a physician are not obtainable, and it often becomes the duty of the teacher not only to render first aid to an injured or sick native, but to care for him through the entire course of severe illness without the aid of a physician.

"A little learning is a dangerous thing," and this is especially true in medicine. Teachers are warned to be careful in prescribing. It is often difficult to make a diagnosis of the disease with which the patient is suffering. To lessen this difficulty, a chapter on symptoms has been prepared, which will be of assistance in determining any case.

Study this book carefully and remember *that all doses given in it are for adults unless otherwise specified.* The proper dose for a child can be
