The first part contains two introductory chapters, of which Chapter I describes the Boundary as defined by law and the authority under which the Commission was appointed, and Chapter II contains the instructions and descriptions of the methods of survey, system of control and types of monuments used. The general operations of the Commission are described in succeeding chapters.

Accompanying the report is an atlas of map sheets containing Nos. 1 to 16A, which deal particularly with Part I of the report. A general description of the map sheets will be found following Chapter VI of this part of the report.
