DIABETES

ESPECIALLY WITH REFERENCE TO TREATMENT

WILLIAM RICHARDSON, M.A., M.D.

MEMBER OF THE ROYAL COLLEGE OF PHYSICIANS, LONDON.

LONDON:
H. K. LEWIS, 136 GOWER STREET, W.C.
1871.

157. m. 161.

P R E F A C E .

TEN years ago the author of this little work was attacked with Diabetes which presented symptoms of a very formidable character. He entirely treated himself, and, after the failure of every remedy, dietetic and medical, which he found recommended on good authority, was gradually led to the method of treatment he advises in the following pages. He has not only cured himself, but also many others who have faithfully and patiently carried out the system he advocates. The author repeats, *faithfully and patiently*, for he has found some difficulty in inducing patients to carry it out in its integrity. Some object to the bath, as involving much domestic inconvenience, and exposing to the danger of colds, etc., while others, overcome by the feeling of lassitude and weakness peculiar to the disease, consider themselves incapable of taking the walking exercise essential to recovery. With such feel-

ings the author can fully sympathise, as he experienced them to an extreme degree. These objections must not, however, be entertained by him who desires relief. The bath and walking exercise are of peculiar importance in the treatment, so much so, that if either is neglected, but little good will result.

To fairly test the system of treatment it must be carried out as a whole, in fact the gradual relaxation of the diet without the exercise would be positively injurious.

The drugs recommended are few, but if employed as directed, they will be found an essential part of the treatment. The author did not get clear of sugar till he used them. It will be seen that the doses are small; irritation from their necessarily long use is thus avoided, a point the author thinks not sufficiently attended to in the treatment of chronic diseases.

25 Gloucester Gardens, London. W.
March, 1871.

CONTENTS.

	PAGE
CHAPTER I.	
HISTORY AND THEORY OF DIABETES. . . .	I
CHAPTER II.	
SYMPTOMS	15
CHAPTER III.	
CAUSES	29
CHAPTER IV.	
GENERAL COURSE OF DIABETES	44
DIAGNOSIS	48
PROGNOSIS	52
CHAPTER V.	
THE NATURE OF DIABETES	56
CHAPTER VI.	
TREATMENT	73

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The analysis focuses on identifying trends and patterns over time, which is crucial for making informed decisions.

The third section provides a detailed breakdown of the results. It shows that there has been a significant increase in sales volume, particularly in the online channel. This is attributed to the implementation of the new marketing strategy and the improved user experience on the website.

Finally, the document concludes with a series of recommendations for future actions. It suggests continuing to invest in digital marketing and exploring new product lines. The author also notes that regular audits and updates to the data collection process are necessary to maintain the accuracy and reliability of the information.
