# Richter's Chemistry.

A Standard and Popular Text-Book.

VOL. I.—INORGANIC CHEMISTRY. From the Fourth German Edition. 89  
Wood-cuts and Colored Lithograph of Spectra.

VOL. II.—THE CHEMISTRY OF CARBON COMPOUNDS, OR, ORGANIC  
CHEMISTRY. From the Fourth German Edition. Illustrated.

Authorized Translations by

**EDGAR F. SMITH, M.A., Ph.D.,**

*Prof. of Chemistry in Wittenberg College, Springfield, Ohio; formerly in the  
Laboratories of the University of Pennsylvania and Muhlenberg Col-  
lege; Member of the Chemical Societies of Berlin and  
Paris, of the Academy of Natural Sciences  
of Philadelphia, etc., etc.*

In most of the chemical text-books of the present day, one of the striking features and difficulties with which teachers have to contend is the separate presentation of the theories and facts of the science. These are usually taught apart, as if entirely independent of each other. In this work, which has been received with such hearty welcome, theory and fact are brought close together, and their intimate relation clearly shown. From careful observation of experiments and their results, the student is led to a correct understanding of the interesting principles of chemistry. The matter is so arranged as to adapt the work to the use of the beginner, as well as for the more advanced student of chemical science.

From F. A. ГЕГТИ, Prof. of Chemistry; F. A. ГЕГТИ, JR., Ass't Prof. of Chemistry,  
University of Pennsylvania.

"We have examined with much care the 'Inorganic Chemistry' of Prof. Victor von Richter, recently translated by Dr. E. F. Smith. Both theoretical and general chemistry are treated in such a clear and comprehensive manner that it has become one of the leading text-books for a University course in Germany. We are indebted to Dr. Smith for his translation of this excellent work, which may help to facilitate the study of chemistry in this country."

This work is now recommended at Dartmouth College, Hanover, N. H.; Rensselaer Polytechnic Institute, Troy, N. Y.; Wittenberg College, Springfield, Ohio; University of Pennsylvania, Philadelphia; Muhlenberg College, Allentown, Pa.; West Virginia State University, Morgantown; Swarthmore College, near Philadelphia; Wisconsin State University, Madison; Trinity College, Hartford, Conn., and many other Schools and Colleges.

\* \* \* Correspondence is invited from teachers and professors of chemistry in reference to the introduction of these books. Each volume sold separately.

PHILADELPHIA.

# CONTENTS.

---

## PART FIRST.

	PAGE
I. OXYGEN.....	9
II. HYDROGEN.....	13
III. CHLORINE.....	16
IV. NITROGEN.....	19
V. SULPHUR.....	23
VI. PHOSPHORUS.....	28
VII. CARBON.....	29
VIII. FLUORINE.....	33
IX. POTASSIUM.....	34
X. SODIUM.....	37
XI. AMMONIUM.....	40
XII. BARIUM.....	41
XIII. CALCIUM.....	42
XIV. MAGNESIUM.....	44
XV. ALUMINIUM.....	45
XVI. IRON.....	45
XVII. MANGANESE.....	48
XVIII. CHROMIUM.....	49
XIX. ZINC.....	50
XX. COPPER.....	51

	PAGE
XXI. MERCURY.....	54
XXII. LEAD.....	56
XXIII. SILVER.....	57
XXIV. TIN.....	59
XXV. ANTIMONY.....	60
XXVI. ARSENIC.....	61
XXVII. PLATINUM.....	62

## PART SECOND.

XXVIII. APPROXIMATE RATIOS.....	63
XXIX. TEMPERATURE AND ATMOSPHERIC PRESSURE.....	64
XXX. MIXED PROBLEMS.....	65
ANSWERS TO PROBLEMS.....	83
