Reborn 12-7-39 M.J.G.

THE object of the Author in writing this Manual was, first, to assist pupils on joining an office to understand what was going on around them; and, secondly, that it should be a book of reference in the various routine steps up to the preparation and letting of a Railway contract.

The Author in this work only deals with ordinary every-day work, leaving anything outside that to be sought in the many treatises specially written on the various subjects that a Railway Engineer may have exceptionally to deal with.
