## P R E F A C E .

---

Under direction of the Board of Trustees, the twelfth annual report of the Missouri Botanical Garden is presented to the public.

The eleventh report was issued February 3, 1900. Separates from the present volume were issued on the dates noted: Von Schrenk, A disease of the black locust, February 10, 1901; Ferguson, Crotons of the United States, February 16, 1901; Toumey, An undescribed Agave from Arizona, April 6, 1901; Trelease, A cristate Pellaea, April 6, 1901; Trelease, A Pacific-slope palmetto, April 16, 1901.

These reports are sent to scientific institutions and journals, in exchange for publications and specimens desirable for the library, herbarium or collection of living plants of the Garden, and, when possible, reprints of the botanical articles they contain are presented to botanists occupied with a study of the subjects these refer to. Any of the Garden publications not out of print may be purchased at approximately the cost of publication from A. I. Eriksson, Tufts College, Mass.; R. Friedländer & Sohn, Berlin, Germany; W. Wesley & Son, London, England; or the undersigned.

WILLIAM TRELEASE.

ST. LOUIS, MO., May 10, 1901.
